

10 rules I run my bot team by

I run a one-person studio with 11 Grok Bots: a Chief of Staff and ten specialists. These are the rules that keep it from turning into chaos. Every one came from something going wrong.

01 Draft, never send.

Bots write emails, posts, and replies. You press send. “Keep marketing like before” isn’t permission. Each post or batch needs a fresh OK.

03 One source of truth.

Priorities live in one place (a GitHub repo, a doc). When chat and the doc disagree, the doc wins.

05 One coordinator, many specialists.

A Chief of Staff routes the work. Specialists stay in narrow lanes with a written “never do” list.

07 “Done” means checked, not claimed.

A hand-off is finished when the files actually exist where they should, not when a bot says so.

09 Every failure becomes a rule.

What failed? Process, context, permissions, or judgement? Where could it have been caught? What one change fixes it? Rule, skill, escalation, or hold?

02 Standing GOs get caps and a stop button.

If you do let a bot act on its own, set a limit and a stop rule, e.g. “10 comments/day, stop on the first warning.”

04 Rank 1 to 3 priorities. Park the rest.

Parked items get a one-line nudge in the weekly review until you unpark or kill them.

06 Tag bot-to-bot messages PRIORITY or FYI.

Otherwise everything feels urgent and nothing is.

08 Heavy jobs go out. Small receipts come back.

Send big builds to Grok Build with a clear brief, and take back a small manifest file. Publish slim. My first fat publish failed intake.

10 Honest numbers only.

If you don’t have a number, write “unknown.” Never let a bot invent metrics. Mine still reads \$0 in sales, and the scorecard says so.

Start here: the free Chief of Staff template

Reads your priorities from one doc, protects your time, drafts everything for your OK, and never sends on its own.

Get it: github.com/w0rldwid3vib3s/grok-bot-studio-kit

Want the whole system? *Run a One-Person Studio with Grok Bots* (coming soon) covers 12 chapters, 6 specialist bot prompts, a routines cookbook, and the full rules library.
